Общие сведения

ML Engineer with 4+ years of experience designing, building, and deploying AI-powered services. I specialize in high-load AI systems, focusing on end-to-end development: from architecture to production, along with continuous quality improvement and optimization. Contact:- Telegram: <https://t.me/illedaniel>- Email: danielille100@gmail.com

Опыт работы

Alfa-Bank

RAG / Python Engineer

марта 2025 - Present (1 год 5 месяцев)

Development of a Retrieval-Augmented Generation (RAG) System and a Multi-Agent Platform at Alfa Bank. Working across both ML and backend on the core services.

- Design and implementation of a RAG system for searching through banking services
- Development of the backend for high-load RAG pipelines: search, data ingestion, and data updating
- Creation of a multi-agent system to solve banking tasks using relevant Skills (LLM agents)
- Implementation of the orchestrator service for agent routing and subsequent decision-making
- Development of Skills across various banking sectors
- Improving model quality and optimizing models powering search and agents
- End-to-end deployment of services to production

Mad Devs

ML Engineer

июля 2022 - марта 2025 (2 года 9 месяцев)

Built and optimized services for B2B platforms: a contextual ad generator (Peklo Tools) and a chatbot (Enji's Copilot) integrated with team collaboration tools (Confluence/Jira/Bitbucket, Notion, GitLab, etc.)

- Hardware optimization and finetuning of ML models for high throughput on constrained resources
- Built a Retrieval Augmented Generation (RAG) solution with dynamic integration into clients team tools
- Integration and deployment of both products into business processes

Образование

MIREA (Russian Technological University)

Bachelor of Science - BS, BioTech · (сентября 2022 - июня 2026)
